DØ Grid Production Workshop
INTRODUCTION

Adam Lyon
(CD REX Ops/DØ)

April 11, 2007

Thank you for coming!

Why are you here?

Winding down SAMGrid
DØ Task List
Understand the system
Gather input for improvements
Forward looking

DØ Relies on SAMGrid system for remote processing

Automate use of the Grid

DØ Task List

MC: write intermediate files, start in the middle, alter workflow (run other programs)

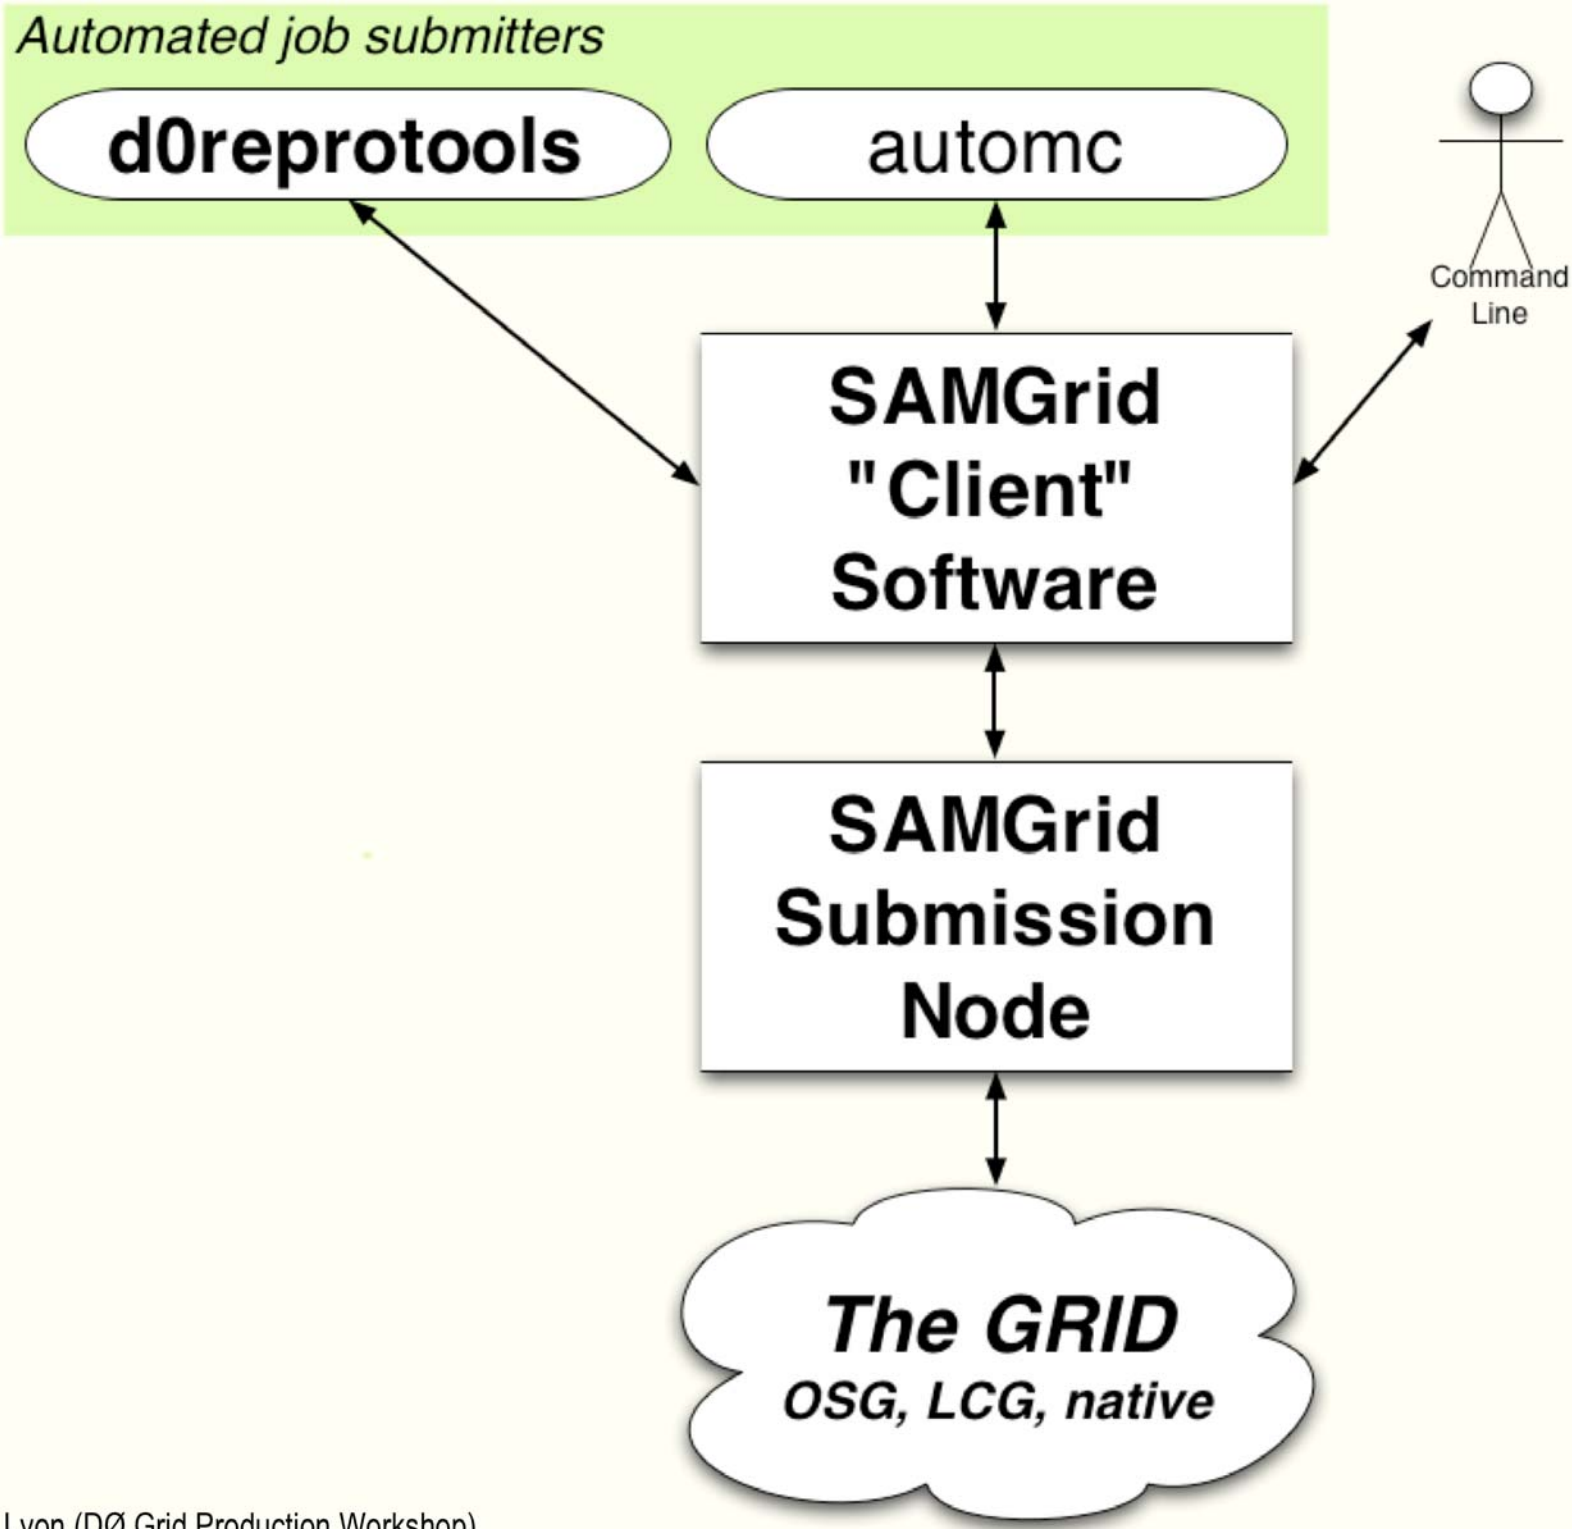
Collider Data Production:
Skimming, CAF production, run standalone code (raw2sim, AADST, recocert), merge recocert, merge multiple streams, broker, fixing, analysis

Current System

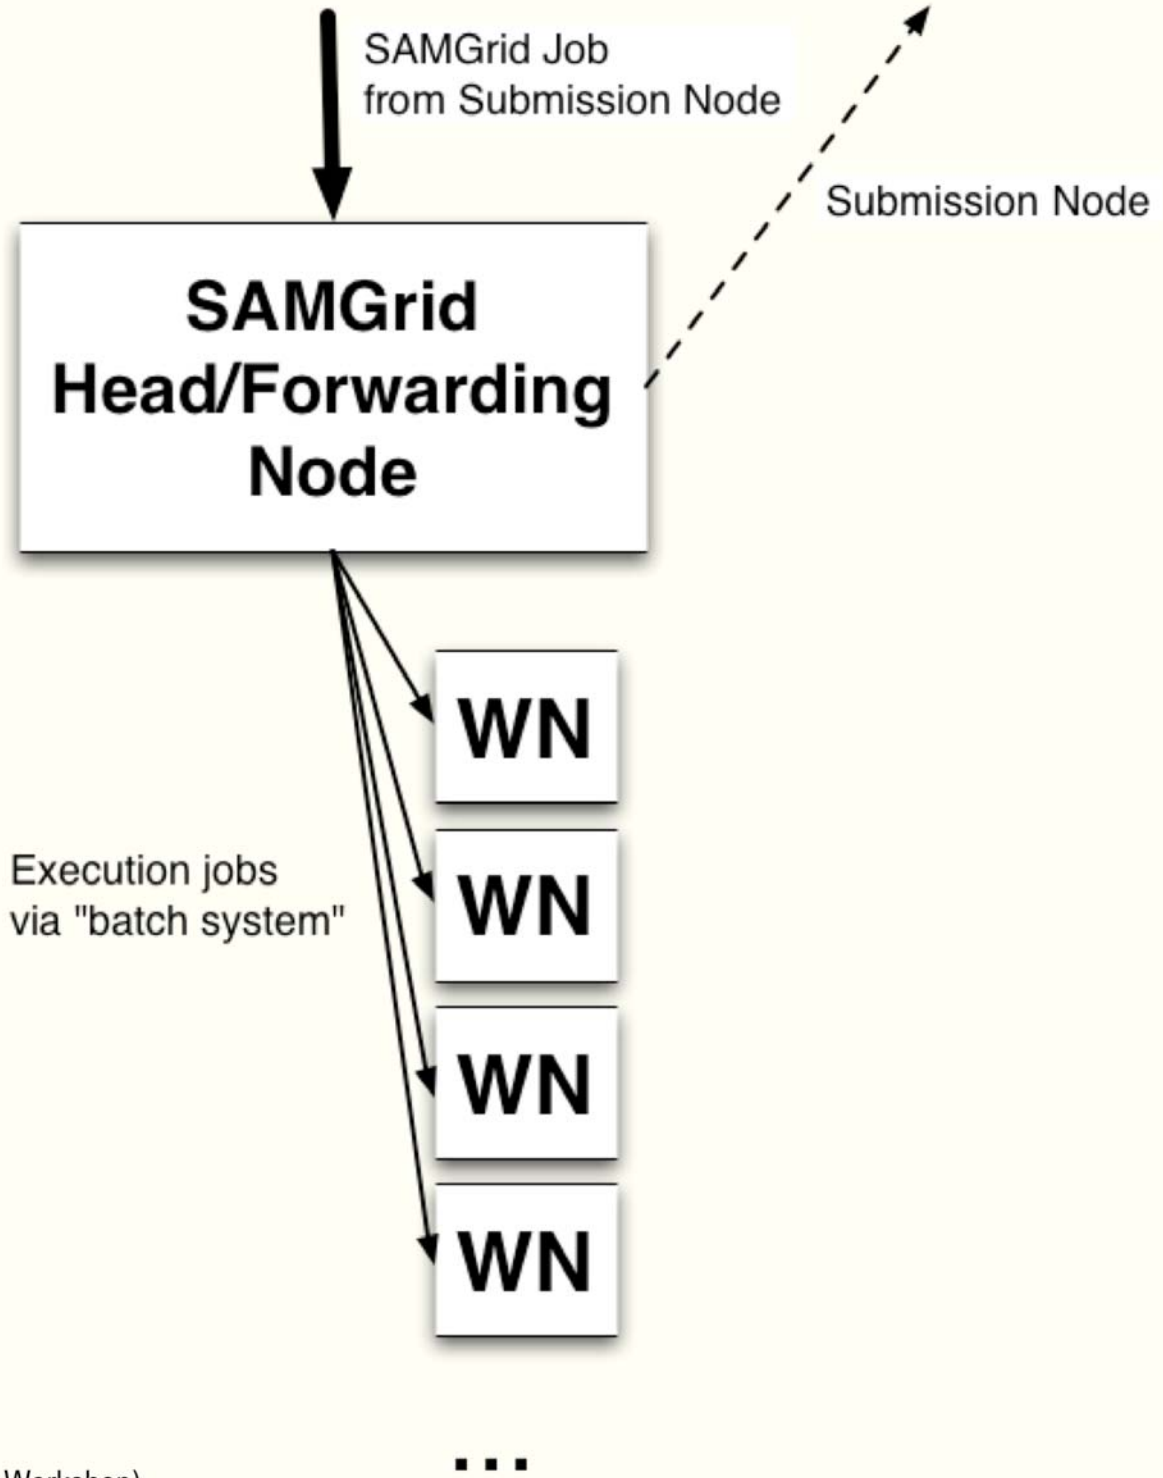
Submitting SAMGrid jobs

Routing the execution jobs to the worker nodes

Running the application



Automated job submitters
d0reprotools
automc
Command Line
SAMGrid "Client" Software
SAMGrid Submission Node
The GRID
OSG, LCG, native



SAMGrid Job
from Submission Node

Competing Expectations

Efficiency

Expediency

Maintainability

What do do?
How can you help?

Remember the reality!

Experiences of others?
Code and expertise to utilize?
